Profile

Highly motivated Software Engineer with a passion for coding and problem-solving. As a full stack developer, I have applied my knowledge in several projects, demonstrating my ability to work with both front-end and back-end technologies. I am always eager to learn and contribute to innovative projects, leveraging my skills and expertise to deliver high-quality software solutions.

Education

Bachelor's degree in Software Engineering, *King Saud University with GPA of 4.8*   2021 – 2025
Specializing in the software life cycle. With a **GPA of 4.8**, my education has equipped me with comprehensive knowledge of software development methodologies, from inception to deployment, ensuring proficiency in managing the entire software development process effectively

Professional Experience

Web Developer, *Sani*   Dec 2022 – May 2023
I specialized in creating websites for nonprofit organizations. Working closely with a dedicated team, we crafted custom solutions to boost their online presence and support their missions effectively.

Forward Program, *McKinsey & Company*   Jun 2023 – Dec 2023
During my 6 months internship at McKinsey & Company Forward Program, I enhanced my soft skills through engaging projects and mentorship. I developed effective communication, teamwork, and problem-solving abilities, preparing me for success in my career.

Volunteering

Leader of the Technical Committee, *SSC Students Club*   2022 – present
 I spearheaded initiatives to provide valuable courses and workshops to fellow students. One of our notable achievements was the development of the club's website, which served as a hub for resources and information.

Projects

Fields, *A user-friendly website for stadium bookings. Owners add venues, customers book slots, with secure chat. Built with PHP, Bootstrap, and phpMyAdmin for seamless functionality.*

Places, *Harnessing the power of React, Redux, and Google Maps API, our platform lets you log in and effortlessly share your favorite spots, creating a vibrant community of travelers and explorers.* ⌞
